Introduction

Microlinks has designed a state-of-the-art mobile trading application for equity brokerage, providing seamless and convenient trading on the go. Empowering users with real-time market insights, intuitive navigation, and powerful tools, our app is crafted to elevate your trading experience. Detailed information about the features of the mobile trading terminal is described below.

1. **Flair** – Android Trading App.
 2. **iFlair** – iPhone Trading App.
-
1. INSTALLATION PROCEDURE FOR ANDROID & iOS: Navigate to the App Store, search for 'iFlair,' and install the application. Once installed, launch the application and enter your user ID and password to log in
 2. Automatic version update. If new version is released in the production environment, application does not run before installing the updates.
 3. The user has received the ID and password in their email inbox. After the download is complete, the login screen will appear.

Login Window

- ❖ Enter the 'User ID / User Name' and password.
- ❖ Proceed to enter the application, press the 'Login' button after providing user credentials
- ❖ To close the application, click on 'Cancel' button.
- ❖ 'Forgot Password' use to recover the forgotten password.
- ❖ Users can also log in using biometrics.
- ❖ If the user doesn't have an account, click on the digital account opening and follow the provided procedure.

Market Watch

- ❖ The Market Watch window provides information on market volume, market status, symbol buying and selling prices, along with high, low, upper, and lower caps.
- ❖ Users can check the current market value of scripts and open the script search window by tapping a specific button. Furthermore, they have the capability to search for and add scripts to their Market Watch.
- ❖ The navigation between tabs, including Market, Order, Main Menu, Trading Alerts, and logout, is facilitated by tapping the respective buttons.
- ❖ The user can view various indices and exchange volumes in the indices bar according to their specific requirements.
- ❖ The Menu button enables users to carry out specific tasks or access various settings and functions within the application.

Buy & Sell Order

- ❖ Users can enter buy or sell orders with limit prices, market prices, SLO (Stop Loss Orders), FOK (Fill or Kill), and IOC (Immediate or Cancel).

SLO – Stop Loss Order

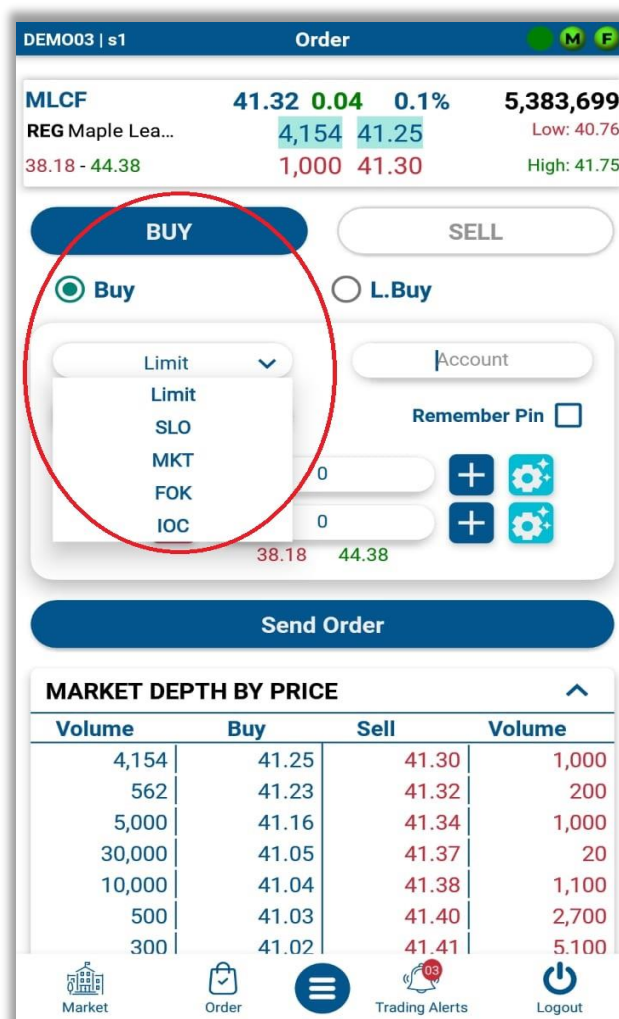

- ❖ Users can also place Stop Loss Orders (SLO) according to their specific requirements.

FOK – Fill or Kill Order

- ❖ Fill or kill is a type of equity order that requires immediate and complete execution of a trade or its cancellation, and it is typical for handling large orders.

IOC - Immediate or Cancel Order

- ❖ An immediate or cancel order (IOC) tries to fill as much of an order as possible in the next few seconds and then cancels any balance and it is typical for handling large orders.
